Give the redshift of the source. The search button will help find it

Change the source search area

Click on the Search to run NED resolver : retrieve the list of source in the FoV

Search NED data for a flat universe

H₀ Omega_M

Redshift Velocity DL

→ This will display the list of known sources found in the FoV with their redshifts and distances. Adapt the cosmology if needed.

Data from NED

Flat Universe with $H_0=69.6$, $\Omega_M=0.286$

Object Name	RA	Dec	Type	Redshift	Separation (arcsec)	Separation (kpc)
NGC 0940	2:29:27.499	+31:38:27.300	G	0.0170750003	0.300	0.105

In blue : link to NED

→ This will display the list of known sources found in the FoV with their redshifts and distances. Adapt the cosmology if needed.

Click on the row to select the source. This will
(i) add a marker at the source position in the map
(ii) write the marker position in the box
(iii) Select the source redshift

(i) marker position

(iii) source redshift /velocity

(ii) marker coordinates

Select a catalogue of theoretical line frequencies

- Local is a small local catalogue
- ISM is a sub-catalogue of CDMS
- ISM-CSM is a larger sub-catalogue of CDMS (InterStellar Medium and Circus Stellar Medium)
- CDMS is the full CDMS catalogue

Filter the line search by

- Line intensity
- Upper Energy
- Number of atoms in the molecule
